

ANIRUDH NAYAK

Phone: +1 (970)-722-8228 | Email: anirudh.cle@gmail.com | www.linkedin.com/in/anirudh-nayak-007233153/

SKILLS

- **Cloud:** EC2, S3, VPC, IAM, RDS, EKS, CloudWatch
- **DevOps CI/CD:** Jenkins, Github Actions
- **Infrastructure as Code:** Terraform
- **Containers:** Docker, Kubernetes (EKS)
- **Security:** IAM, RBAC, TLS/SSL, SSH, OAuth (basic), VPC Security
- **Monitoring:** CloudWatch, Prometheus, Grafana
- **Tools:** Git, Github

PROFESSIONAL EXPERIENCE

DevOps Intern | Namitus Technologies, Remote, US Feb 2026 - Present

- Developed and maintained Python and Bash scripts to automate deployment workflows, reducing manual effort and improving consistency across environments.
- Integrated security validation steps within Jenkins CI/CD pipelines, enabling early detection of misconfigurations and aligning with DevSecOps practices.
- Built and optimized Docker images with focus on secure configurations, minimal base images, and efficient layering.
- Deployed and managed containerized applications on AWS ECS/EKS, implementing secure IAM roles and controlled network access
- Monitored application and infrastructure performance using AWS CloudWatch, identifying and resolving issues proactively
- Documented deployment processes, automation scripts, and security configurations for team knowledge sharing and onboarding

Product Support Engineer | Ola Electric Pvt Ltd Feb 2022-May 2023

- Supported day-to-day operations of AWS-based cloud environments, assisting with basic configurations in IAM, VPC, and security groups.
- Wrote simple Python and Bash scripts to automate routine tasks such as log cleanup, system checks, and updates
- Monitored system and application health using AWS CloudWatch dashboards and alerts, helping identify issues early
- Troubleshoot basic system, network, and access-related issues under guidance, including connectivity and permission errors
- Collaborated with team members to ensure system uptime and reliable service performance

Machine Learning Intern | Otomeyt.ai Aug 2019-Dec 2019

- Built and tuned regression models (Linear, Ridge, Random Forest) to predict performance metrics with improved accuracy.
- Automated evaluation and visualization workflows using Python, pandas, scikit-learn, and matplotlib, improving analysis efficiency.
- Implemented TF-IDF vectorization and preprocessing pipelines to enhance text analytics and feature extraction.

EDUCATION

• Master in Management Information Systems Jan 2024-Dec 2025

Cleveland State University, Cleveland, OH

• Bachelor of Engineering in Information Science Aug 2016-Jul 2021

Viswesvarayya Technological University, India

ACADEMIC PROJECTS

End-to-End DevOps Implementation on Web Application (AWS, Docker, Kubernetes, CI/CD) Aug 2024-Dec 2024

- Implemented end-to-end DevOps pipeline for a web application, automating build, test, and deployment workflows
- Containerized application using Docker and deployed on Kubernetes for scalable orchestration
- Set up CI/CD pipelines using GitHub Actions and Argo CD (GitOps) for automated deployments
- Built and managed Helm charts for multi-environment deployments
- Configured Ingress and DNS to securely expose the application

CERTIFICATIONS AND LEADERSHIP

- **AWS:** Certified Cloud Practitioner
